Manufacturer

The Cardiff is an exclusive and sustainable, transportable goal of 5x2m, which is suitable for placement on practice fields. The Cardiff is finished in a high quality and is provided with sturdy shores, net shackles and extrusion profiles to lengthen the sustainability of the goal. The goal has a hookless net fixation through a synthetic net strip. The net fixation with a synthetic net strip is very safe, because it contains no protruding parts. Next to safety, you will also no longer be bothered by vulnerable brackets and optic it looks very nice as well. To hang the goal net perfectly, the Cardiff is provided with a steel tension cable so the net is easy to span. The Cardiff has two wheels on the backside, which are suitable for transport over (artificial) grass fields. On the outside of the Cardiff there are carriage shackles to easily lift the goal. The Cardiff is very suitable for intensive practice use.

Warranty on the construction excluding the net and synthetic net strip.

Delivery time: 2 - 6 weeks depending on destination

3 years warranty
